

Data and Semantic AI Tools

The most commonly used GRL tools.

OL

GRL OntoLinter (basic)

Free linter to check ontology quality.

OL

GRL OntoLinter (advanced)

Tool with advanced quality checks for ontologies.

OM

GRL Ontology Manager

Create, edit, govern and publish ontologies for teams.

GEN

GRL Generators

Connect instantly to a semantic graph database, create instant APIs, React apps, MPC servers, data products and governed agents from an ontology – useful for testing and deployment into production environments as well as to create stand alone data assets.

SAH

GRL Semantic Agent Harness

Create governed agents to extend agent accuracy and compliance.

GM

GRL Governance Metagraph

Provides centralised view of all provenance and governance data from GRL tools.

ONE PLATFORM, ONE TRUTH

Every tool in the catalogue draws from the same governed ontology and produces the same shared source of truth, provenance trail, audit history, and governance layer.

TO LICENCE

Annual licences quoted per environment. To learn more, contact: dougal.watt@graphresearchlabs.com
